COMPANY OVERVIEW

Integrated contracting capability for Saudi Arabia's evolving built environment

Wattle Contracting delivers coordinated civil, structural and building-services capability for projects that require practical execution, clear communication and dependable site delivery. As a Wattle Holdings business, we support commercial, industrial, residential and infrastructure environments across Saudi Arabia.

Our approach combines planning, multidisciplinary coordination and responsible delivery to help clients move from early works through completion with confidence.

OUR GROUP

Local contracting delivery backed by broader group capability

Wattle Contracting operates under Wattle Holdings and benefits from the wider business perspective of Global Facilities Management Services Group, Australia. This group relationship brings together local contracting delivery, practical coordination and a broader understanding of how assets are delivered, occupied and supported over time.

The result is a disciplined, delivery-focused approach shaped by clear communication, technical coordination and a strong awareness of client expectations across the project lifecycle.

Group structure

What this means for clients

SERVICES OVERVIEW

Integrated Contracting Services

Wattle Contracting delivers integrated solutions across civil, mechanical, electrical, HVAC, firefighting and fit-out scopes. Our coordinated approach helps clients manage programme, interfaces and site execution through a single, trusted delivery partner.

01

Civil & Structural Engineering

Practical civil works, structural coordination and construction support.

02

Mechanical Engineering & Industrial Solutions

Piping, plant interfaces, equipment installation and industrial systems.

03

Electrical Systems & Power Infrastructure

Power distribution, containment, cabling and equipment integration.

04

HVAC Engineering

Airside and waterside systems, ventilation, ducting and environmental control.

05

Firefighting & Life Safety

Fire protection systems, coordinated life-safety scope and compliance-focused delivery.

06

Fit-Out & Completion Works

Interior finishing, coordination, finishes and final-stage project completion.

SERVICE PROFILE

Civil & Structural Engineering

Coordinated civil execution, structural interfaces and dependable site delivery.

Wattle Contracting supports civil and structural packages with practical coordination, disciplined site execution and clear interface management. Our approach helps keep foundations, concrete works, structural elements and site activities aligned with programme, quality and delivery requirements.

Foundations & Substructure

Preparation works, excavation interfaces, reinforcement coordination and concrete activities managed for smooth site progress.

Concrete & Structural Works

Support for concrete frames, structural sequencing and construction activities that need clear coordination across trades.

Site Review & Supervision

Practical monitoring, reporting and day-to-day supervision that help maintain workmanship and project control.

Quality & Delivery Alignment

Progress visibility, interface follow-up and delivery-focused coordination to keep works buildable and organized.

Scope of Support

Site preparation and civil work interfaces

Reinforcement and concrete package coordination

Structural activity planning and sequencing

Site inspections, reporting and follow-up

Quality, safety and progress monitoring

SERVICE PROFILE

Mechanical Engineering & Industrial Solutions

Practical piping networks, equipment packages and interface coordination for dependable system performance.

Wattle Contracting supports mechanical packages across building services and industrial applications. Our work covers piping networks, pump skids, utility systems and coordinated installation support to help equipment fit, perform and hand over efficiently. The focus is on organized execution, interface management and dependable delivery across active project environments.

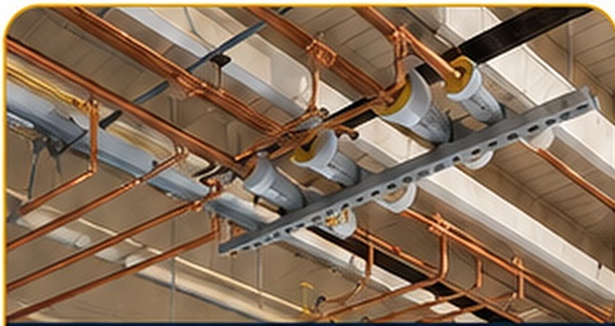

Industrial Piping Networks

Pipe routing, supports and coordinated installation for organized mechanical distribution systems.

Pump Skids & Equipment Packages

Support for packaged equipment, pump skids and connection interfaces that need precise fit-out and dependable integration.

Utility & Chilled Water Systems

Mechanical utility lines and chilled water networks coordinated for continuity, access and maintainability.

Installation Review & Delivery Control

Site review, installation follow-up and practical coordination to keep mechanical works aligned with programme and quality expectations.

Scope of Support

Mechanical room and equipment layout support

Piping fabrication, routing and interface coordination

Skid installation, alignment and connection management

Utility, chilled water and process line support

Inspection, testing and handover follow-up

SERVICE PROFILE

Electrical Systems & Power Infrastructure

Reliable electrical execution, power distribution interfaces and orderly delivery across project environments.

Wattle Contracting supports electrical packages from power infrastructure interfaces to building distribution and equipment areas. Our work focuses on practical coordination, installation support and controlled delivery across substations, electrical rooms and connected systems. The objective is clear sequencing, safe execution and dependable project close-out.

Power Distribution Interfaces

Support for distribution systems, routing coordination and organized installation across project environments.

Substations & Outdoor Equipment

Practical delivery support for substations, yard equipment and power infrastructure interfaces.

Electrical Rooms & Panels

Panel rooms, switchgear spaces and electrical areas coordinated for access, order and maintainability.

Testing, Review & System Readiness

Inspection follow-up, system review and controlled progress toward energization and handover.

Scope of Support

Electrical containment and routing coordination

Panel, switchgear and distribution room support

Substation and outdoor equipment interface management

Testing, inspection and energization readiness

Completion tracking, documentation and follow-up

SERVICE PROFILE

HVAC Engineering

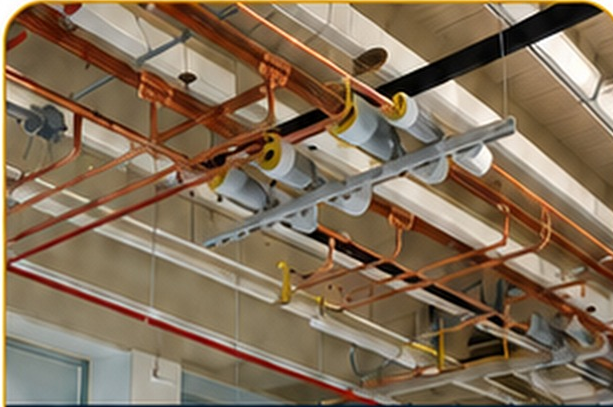

Airside, waterside and environmental control systems delivered with practical coordination.

Wattle Contracting supports HVAC packages with disciplined planning, coordinated installation and dependable site execution. Our approach helps align ventilation systems, chilled-water networks, plant-room interfaces and performance-focused delivery across commercial, industrial and institutional projects.

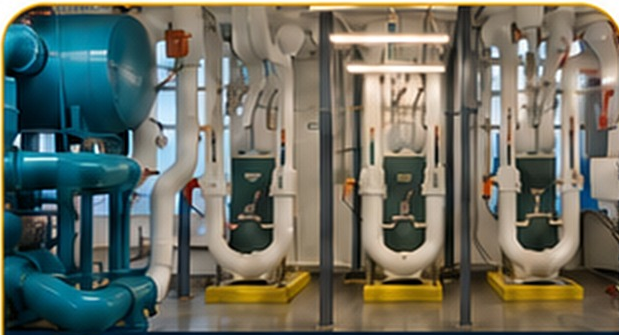

Ventilation & Ductwork

Air distribution routes, duct installation and ceiling coordination managed for clean, buildable outcomes.

Chilled Water & Pipework

Pipework, supports, valves and service interfaces aligned for practical installation and system continuity.

Plant Rooms & Equipment

AHUs, FCUs, pumps and mechanical equipment positioned with access, maintenance and integration in mind.

Testing, Balancing & Commissioning

Inspection, readiness checks and delivery follow-up that support stable operation and handover.

Scope of Support

Ventilation and air distribution systems

Chilled-water and HVAC pipework coordination

Plant-room equipment interfaces

Installation review and commissioning support

Quality, safety and progress monitoring

SERVICE PROFILE

Firefighting & Life Safety

Coordinated fire protection systems and life-safety execution for reliable, compliant delivery.

Wattle Contracting supports firefighting and life-safety works through practical coordination, disciplined installation and dependable site follow-up. Our scope helps align fire piping, suppression equipment, alarm interfaces and readiness activities so projects move toward inspection, approval and handover with confidence.

Fire Piping & Distribution

Sprinkler, hydrant and hose-reel pipework coordinated for orderly installation and efficient service routing.

Suppression Systems

Specialized suppression equipment and associated system components integrated with practical site execution.

Alarm & Control Interfaces

Panels, control equipment and related interfaces aligned with electrical and MEP coordination needs.

Inspection, Testing & Readiness

Site review, testing support and follow-up actions that help prepare systems for final approval and handover.

Scope of Support

Sprinkler, hydrant and hose-reel networks

Fire suppression equipment and components

Fire alarm and control panel interfaces

Inspection, testing and handover readiness

Safety, compliance and coordination follow-up

SERVICE PROFILE

Fit-Out & Completion Works

Refined interiors and close-out activities delivered with coordination, finish quality and handover readiness.

Wattle Contracting supports fit-out and completion packages across commercial, workplace and mixed-use environments. Our team coordinates interior finishes, interface management and final-stage execution so spaces move from construction to operational handover with clarity, quality and programme control.

Interior Finishes

Tiling, flooring, partition and architectural finish activities completed with attention to detail and site coordination.

Painting & Surface Completion

Surface preparation, coating systems and final finishing managed for clean, consistent presentation.

Ceiling & Architectural Elements

Ceiling systems, visible details and finishing interfaces aligned with design intent and service access needs.

Final MEP Coordination & Snag Close-Out

Interface review, rectification follow-up and close-out readiness that support practical completion and handover.

Scope of Support

Tiling and floor finishes

Painting and wall treatments

Ceiling and joinery interfaces

Final MEP coordination

Snagging, testing and handover support

Aligned with Saudi Vision 2030

We are committed to supporting Saudi Arabia's ambitious Vision 2030 by delivering world-class infrastructure and construction solutions that drive sustainable growth, diversify the economy, and enhance quality of life.

Economic Diversification

Building sectors of the future

Local Content & Employment

Empowering local talent & SMEs

Sustainable Development

Responsible practices for a better tomorrow

Innovation & Excellence

Delivering smarter, safer, better

Our Commitment Built on Responsibility

At Wattle Holdings, we believe that sustainable growth is built on strong values, long-term partnerships, and responsible practices.

Integrity

We act with transparency and honesty in all we do.

Quality

We deliver excellence in every project.

Safety

We prioritize the well-being of our people and partners.

Sustainability

We build with care for present and future.

Our Promise

We don't just build structures; we build trust, relationships, and a legacy that lasts.

100%

Client Focused

Zero

Compromise
on Safety

Long-Term
Partnerships

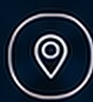

Future
Focused

Building Today. Shaping Tomorrow.

Thank you for your interest in
Wattle Holdings. We look forward
to building success together.
